Domain Registration - Frequently Asked Questions

- » **Will my website run under my own domain?** Yes. Any website package you choose will run under your own unique domain name (www.yourdomain.com).
- » **Will I be able to use my domain for my email address?** Yes. The hosting services offered with the website packages allow you to use your domain for your email address. In addition, as an added benefit your hosting account comes with 10 email accounts.
- » **How do I get a domain and how much does it cost?** It will be registered and set up as part of setting up your website package and hosting. The charge is \$19/year for your domain.
- » **I already have a domain name, can I use it with your website packages?** Yes. If you have already registered a domain, there are no additional fees to transfer it and use it with any website package of your choosing.
- » **I am using my domain for my email, will this be a problem?** No. Simply let us know that you are already using your domain for email and we will coordinate the set up of the hosting in a manner that will not disrupt your email.
- » **I have an in-house mail server that I am using with my domain, will this be a problem?** An MX record (mail exchange record) can be set up to direct all email for your domain to your in-house server at no additional cost.
- » **Can I use more than one domain name for my site?** Yes. Additional hosting services are available that will allow you to use more than one domain name for your site. There is a \$25 setup fee and \$10 monthly fee for this service.
